Step 3 Print Reports

- ⇒ The individual patient immunization reports are opened as PDF documents in a separate window in your browser or in a new tab. To print a report, use your browser’s printing or click the print icon at the top of the PDF.
- ⇒ Click the **Close Tab** button (the “X”) in the Browser’s tab or window to close the report and return to the Immunizations Tab.

When printing any report selecting the Fit size option instead of the Actual size option in the print dialog box will usually yield better printing results.
